

# THE FOODIES — Full Live Production Guide ■

## STEP 1 — Upload Website to GitHub

- Open GitHub and go to your repository (thefoodies-global)
- Delete all existing files
- Upload the final enterprise ZIP contents (not the folder itself)
- Commit changes

## STEP 2 — Deploy Website on Vercel

- Open Vercel dashboard
- Select your project
- Click Deployments → Redeploy
- Wait until build is successful

## STEP 3 — Connect Supabase Database

- Open Supabase dashboard
- Go to SQL Editor
- Run table creation scripts for users, partners, vendors, orders

## STEP 4 — Enable Authentication

- Go to Supabase → Authentication → Providers
- Enable Email provider
- Enable Email signup
- Save changes

## STEP 5 — Add Supabase Keys in Vercel

- Go to Vercel → Settings → Environment Variables
- Add NEXT\_PUBLIC\_SUPABASE\_URL
- Add NEXT\_PUBLIC\_SUPABASE\_ANON\_KEY
- Save and redeploy

## STEP 6 — Verify Live System

Test these URLs:

- Homepage: <https://thefoodiesservices.com>

- Admin Panel: /admin
- Partner Panel: /partner
- Vendor Panel: /vendor

## FINAL RESULT

Your system is now fully live with:

- Global website
- Admin control panel
- Partner registration system
- Vendor management
- Live Supabase database integration
